

# Prepare Patients for Discharge with Allen's Video-Education Checklist

**ALLEN'S VIDEO-EDUCATION CHECKLIST** provides an easy and effective enhancement to patient education by creating a customized Education Checklist for each patient to follow while preparing for discharge from the hospital. Via Allen televisions, tablets, or touchscreens - video titles pop into the on-screen Checklist as education specific to patient safety, discharge planning, and recovery is assigned during the patient stay. As patients successfully complete a video, their completion is noted on the patient's Checklist. At the same time, videos which have not yet been viewed move to the top of the list, making them easy for patients to select.

## How It Works

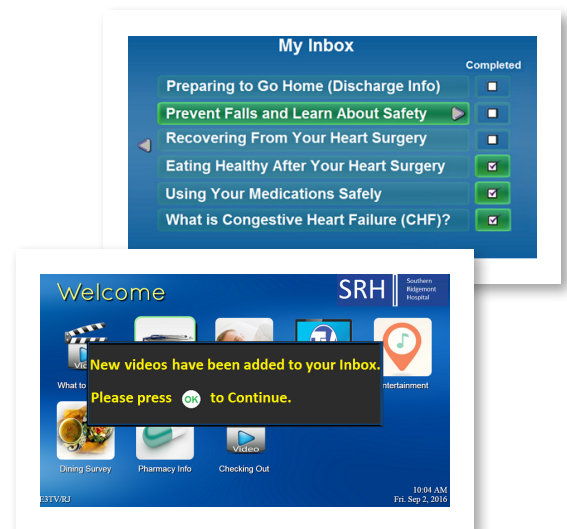

The Video-Education Checklist helps to improve **discharge readiness** and it empowers nurses with a quick on-screen tool used to assess whether or not the patient has completed their required education prior to leaving the hospital. With increased focus on **fall prevention, medications safety, and lowering readmissions**—Allen's Video-Education Checklist fits nicely into most patient education programs and nurse workflow. Allen's Checklist can be customized as well. **Pop-up reminders** can be set-up to let patients know when new **educational videos** have been assigned and education completion results can be written back into the patient's EHR if so desired. The Video-Education Checklist is an effective addition to your Allen system as it works together with all of Allen's education assignment features including:

- Bedside Video-Assignment
- EHR Video Assignment
- Auto-Assigned Video Education

**Learn how your nurses can use Allen's Video-Education Checklist to make patient education management easier, faster and more effective.**

Nurses are busier than ever, with only **37% of their time on average spent directly with patients. At the same time, patient hospital stays are shorter than ever, on average 4.5 days. That leaves little time for patient education before discharge. Making patient education as easy as possible to assign and to view has never been more important.**

## ABOUT ALLEN TECHNOLOGIES

Allen Technologies, the pioneer of interactive patient engagement solutions for nearly 40 years, transforms the way hospitals engage, educate and empower patients. Allen helps hospitals impact patient outcomes, improve patient satisfaction and achieve operational efficiencies. Allen's multiplatform interactive patient engagement system, delivered via television, tablet and bedside monitor, is a robust patient-centric portal for customized patient education, in-room comfort control, and entertainment. Allen's E3 Patient Engagement Solution integrates seamlessly with electronic medical records and system platforms including HVAC, housekeeping and food service systems.
